

Join the Tesla Charging Network

Attract new customers to your property and earn revenue every time they charge.

Products

Wall Connector is the most efficient and convenient Level 2 charging option for residential and commercial properties.

Universal Wall Connector features integrated NACS and J1772 adaptors, and can charge any electric vehicle sold in North America without the need for additional adaptors.

Features

- Up to 44 miles of range added per hour of charging
- Flexible indoor/outdoor installation options, with or without a pedestal
- Wi-Fi connectivity for over-the-air updates, remote diagnostics and 24/7 access
- Industry-leading uptime and site reliability

Benefits

- Easy installation through Tesla's network of Certified Installers
- Attract new tenants or customers
- Increase property value and improve business reputation
- Set your price and keep all revenue, minus a \$0.03 per kWh fee for software, payment processing, and support
- Be listed on Tesla's in-app and in-vehicle charging map (optional)
- Manage everything through your Tesla for Business account
